

Skills & Accomplishments Reference

Matthew Carlson | Senior Marketing & Business Intelligence Analyst
Duluth Trading Company | 2014-2025 (11 Years)
Matthew Carlson Consulting | 2024-Present

SECTION 1: APPLICATIONS & TOOLS PROFICIENCY

Analytics & Reporting Platforms

- Adobe Analytics (Omniure/SiteCatalyst) - Advanced reporting, segmentation, ad hoc analysis
- Adobe Ad Hoc Analysis - Custom data exploration and deep-dive analytics
- Adobe Experience Platform (AEP) - Customer data platform, audience management
- Adobe Audience Manager - Audience segmentation and activation
- Adobe Target - A/B testing, personalization, recommendations engine
- Google Analytics - Web analytics, conversion tracking, attribution
- Incorta - Business intelligence, real-time analytics, custom reporting
- QlikView - Data visualization, interactive dashboards
- SEMRush - SEO tracking, keyword research, competitive analysis
- Screaming Frog SEO Spider - Technical SEO audits, site crawling

Advertising & Campaign Platforms

- Google Ads (AdWords) - Search, Shopping, Display, Performance Max, Local campaigns
- Google Merchant Center - Product feed management, Local Inventory Ads
- Meta Business Suite (Facebook/Instagram) - Ads Manager, Dynamic Product Ads, Audiences
- Meta Brand Protection - Trademark monitoring, infringement takedowns
- Bing Ads - Search and Shopping campaigns, audience targeting
- Pinterest Ads - Shopping campaigns, audience targeting, catalog management
- TikTok Ads - Shopping campaigns, pixel implementation
- Criteo - Retargeting, Dynamic Product Ads, Shopping campaigns
- RTB House - Display retargeting, prospecting, video campaigns
- The Trade Desk - Programmatic display, streaming audio/video, DSP management
- YouTube Advertising - Video campaigns, store visit optimization
- Kenshoo - Paid media management, bid optimization
- Impact (Affiliate) - Partner management, commission tracking, reconciliation
- Avantlink - Affiliate network management

Data Feed & Integration Tools

- ProductsUp - Feed management, transformation, multi-channel distribution
- Marpipe - Dynamic creative templates, automated ad generation
- Bloomreach - Site search, SEO, product recommendations
- PowerReviews - Review syndication, feed development
- Stylitics - Outfit bundling, product collection feeds
- Salesforce Commerce Cloud - Ecommerce platform, data extraction
- Microsoft Dynamics AX - OMS, promotional code management, catalog setup

Marketing Measurement & Attribution

- Ovative Marketing Analytics Platform (MAP) - Multi-touch attribution, incrementality
- Analytic Partners Media Mix Model - Marketing effectiveness, scenario planning
- The Harris Poll - Customer insights, survey development, segmentation
- Google Attribution - Cross-channel attribution analysis
- Facebook Attribution Checkup - Lift testing, conversion measurement

Technical & Development Tools

- SQL - Query development, data extraction, reporting automation
- Visual Basic for Applications (VBA) - Excel automation, workflow optimization
- Google Tag Manager - Tag deployment, data layer configuration
- Ecometry - Legacy ERP, promotional code creation
- Google My Business - Local listings, posts, store information management
- Yext - Local business listings management
- Search Monitor - Brand protection, trademark monitoring
- Podsights - Podcast advertising attribution

Certifications & Training

- Google AdWords Certified (Fundamentals & Shopping) - March 2017
- PPC Hero Conference - April 2016
- MozCon Conference - SEO best practices
- Search Engine Journal Conference - SEM industry trends
- UWEBC Marketing & Ecommerce Meetings - Peer learning, best practices

[NEW] SECTION 1B: AI & DEVELOPMENT TOOLS PROFICIENCY

AI Platforms & APIs

- Claude (Anthropic) - Claude API, Claude Code CLI, prompt engineering, real-time streaming
- ChatGPT (OpenAI) - OpenAI API, GPT-4o, content generation, code assistance
- Google Gemini - Gemini API, multi-modal capabilities, streaming implementations
- Multi-Provider Architecture - Unified interface for seamless model switching with token management

Frontend Development

- React 18 - Component architecture, hooks, state management, routing
- TypeScript - Strict mode, type safety, interface design
- Vite - Build tooling, HMR, production bundling, dev server
- Tailwind CSS - Utility-first styling, responsive design, design tokens
- Recharts - Data visualization, interactive dashboards, custom charts
- HTML5 / CSS3 / JavaScript - Custom static site development, SEO optimization

Backend Development

- Python (FastAPI) - REST APIs, async endpoints, OpenAPI documentation
- Python (Flask) - Web applications, API development
- Python (Pydantic) - Data validation, schema modeling
- Python (PyMC / PyMC-Marketing) - Bayesian modeling, MCMC sampling, Media Mix Models
- Python (pandas, numpy) - Data analysis, transformation, statistical computation
- Node.js - Server-side JavaScript, npm package ecosystem
- SQLAlchemy - ORM, database schema design, migrations

Databases & Storage

- Supabase (PostgreSQL) - Cloud database, row-level security, real-time subscriptions
- IndexedDB - Client-side storage, offline-first architecture
- Airtable - Low-code data management, API integration
- ChromaDB - Vector database, RAG systems, semantic search

Deployment & DevOps

- Netlify - Static site hosting, continuous deployment, serverless functions
- Railway - Backend hosting, environment management
- GitHub - Version control, CI/CD pipelines, collaborative development
- GitHub Actions - Automated testing, deployment workflows

Automation & Integration

- Zapier - Multi-step workflow automation, app integration
- Make (Integromat) - Visual workflow automation, API connectors
- n8n - Open-source workflow automation, self-hosted pipelines
- MCP (Model Context Protocol) - AI tool integration, server configuration
- Custom Python Pipelines - ETL, data processing, API orchestration

Testing & Quality

- Vitest / Jest - Unit testing, integration testing, test fixtures
- React Testing Library - Component testing, user interaction simulation
- ESLint - Code quality, style enforcement
- TypeScript Strict Mode - Type safety, compile-time error prevention

[NEW] SECTION 1C: AI-ASSISTED DEVELOPMENT PROJECTS

SkillEngine: AI Career Productivity Platform

Full-stack SaaS application | Solo-developed in 31 days | aicareerskills.netlify.app

Metric	Value
Development Time	31 days
Lines of Code	125,000+
Application Pages	48
AI Skills	277+
Multi-Step Workflows	24
Professional Role Templates	27
Test Files	316 (1,790 tests)
Commits	311

Key Technical Innovations

- **Multi-Provider AI Architecture:** Seamless switching between Claude, Gemini, and ChatGPT with model-specific token management, unified streaming interface, and error handling
- **AI-Native Skill Engine:** Dynamic skill generation from job descriptions via 3-phase pipeline (Parse, Recommend, Generate); production-grade prompt templates (1,000-3,000 words each)
- **Recursive Self-Improvement System:** Skills collect user grades across six dimensions; when scores drop below threshold, system analyzes feedback patterns, generates targeted prompt improvements, and deploys with rollback protection
- **Workflow Automation Engine:** Chained skill execution with state propagation, global inputs with per-step customization, template interpolation using previous outputs
- **Local-First with Cloud Enhancement:** Fully functional offline via IndexedDB with optional Supabase sync for cross-device persistence and community features
- **Comprehensive Testing:** 1,790 tests across 316 files (29% of codebase); Vitest/Jest for unit tests, React Testing Library for components, skill quality validation fixtures

Tech Stack: React 18, TypeScript, Vite, Tailwind CSS, Supabase, IndexedDB, Claude API, Gemini API, OpenAI API, Netlify, GitHub CI/CD

Media Mix Model Platform

Enterprise-grade marketing attribution platform | Built in 4 hours

- **Bayesian Modeling:** PyMC-Marketing implementation with MCMC sampling, adstock transformations, saturation curves, and uncertainty quantification
- **6 Platform Integrations:** Google Ads, Meta, LinkedIn, Microsoft, TikTok, YouTube with normalized data schemas and automated extraction
- **7 Dashboard Pages:** Executive summary, MMM results, channel deep-dive, customer segments, weekly reports, settings, admin
- **30+ API Endpoints:** FastAPI backend with interactive Swagger documentation, 12 database tables via SQLAlchemy/Supabase
- **Customer Segmentation:** LTV tracking showing Buyers outperform Prospects 4:1; full MQL to SQL to Opportunity to Customer funnel

- **Test Data Generator:** 2 years of synthetic data with realistic seasonality across 6 platforms
- **Enterprise Comparison:** Comparable functionality to \$400K-\$600K/year SaaS platforms typically requiring 6-12 months and teams of 3-8 specialists

Tech Stack: Python, FastAPI, PyMC-Marketing, SQLAlchemy, Supabase (PostgreSQL), React 18, TypeScript, Recharts, Tailwind CSS

AI-Powered Client CRM with Personalized Prospect Portals

Portal-first client management system | Built in 7 days

- **Personalized Portal Pages:** Each prospect receives custom URL (/portal/company-name) with curated AI skills and workflows; no login required to explore
- **Semantic Matching Engine:** Uses company context + deterministic hash variance to generate truly unique skill recommendations per company (same algorithm, different results based on company fingerprint)
- **Dynamic ROI Calculator:** Real-time projections update based on actual skill/workflow time-savings data as selections change
- **Multi-Contact Architecture:** Up to 3 contacts per client with per-contact LinkedIn messaging (Connect 300-char + Follow-up); stored per contact, not per company
- **Industry Coverage:** 85+ target companies across 20 industries with tailored recommendations; 9 skills and 3 workflows curated per client
- **Automated Outreach:** Science-backed persuasive messaging generated per client with intro and follow-up email templates
- **Hybrid Storage:** localStorage + Supabase for offline capability with cloud sync across devices

Tech Stack: React, TypeScript, Supabase (PostgreSQL), IndexedDB, JWT authentication, Netlify

Matthew Carlson Consulting Website

Custom business website | Built in 6 hours | matthewcarlsonconsulting.com

- **AI-Assisted Development Methodology:** Described features in natural language via Claude Code, received production-ready HTML/CSS; iterative refinement through conversation
- **8-Page Custom Design:** Home, About, Services, Case Studies, Projects, Contact, and supporting pages with consistent design system maintained by AI across all pages
- **Strategic Decision - Static over WordPress:** Eliminated database vulnerabilities, plugin maintenance, and security patches; sub-second page loads on basic shared hosting
- **SEO Integration:** Meta tags, Open Graph, local SEO, and semantic HTML generated inline during development
- **Traditional Friction Eliminated:** Theme selection (2-4 hrs), plugin research (2-3 hrs), CSS override debugging (4-8 hrs), database setup (1-2 hrs) = 9-17 hours saved
- **Cost Comparison:** Traditional agency (2-4 weeks, \$3K-\$10K, \$50-200/mo) vs. this build (6 hours, \$0, ~\$12/mo hosting)

Tech Stack: HTML5, CSS3, JavaScript, custom CSS design tokens, PHP contact forms, Claude Code

Security Scanner Module

Automated security audit tooling | Built in 86 minutes (2 commits, 2,400 lines)

- **Reverse-Engineered from Enterprise Audits:** Took categories from professional security audit frameworks and turned them into executable TypeScript code embedded in the application
- **16 Automated Security Checks:** API key pattern detection in localStorage, PII scanning in cached data, cookie security flags, CSP header validation, third-party script inventory, DOM clobbering detection, open redirect vulnerabilities, mixed content detection, SRI verification
- **Living Scanner vs. One-Time Report:** Weighted scoring with A-F grades, scan history tracking, CSV export; embedded in admin panel for on-demand execution
- **Development Speed:** First commit delivered 5 core checks + full React admin panel; second commit (26 min later) tripled coverage to 16 checks

AI-Assisted Development Velocity Summary

Project	Dev Time	Scale	Traditional Equivalent
SkillEngine Platform	31 days	125K lines, 277 skills	2-3 months, team of 3-4
Media Mix Model	4 hours	7 dashboards, 30+ endpoints	\$400K-\$600K/yr SaaS
Client CRM / Portals	7 days	85+ companies, 20 industries	2-4 weeks agency
Consulting Website	6 hours	8 pages, custom design	2-4 weeks, \$3K-\$10K
Security Scanner	86 minutes	16 checks, admin panel	Days of manual audit

SECTION 2: KEY IMPLEMENTATIONS & PROJECTS

Data Feed Infrastructure Development

Core Product Feed Architecture

- Designed and implemented Salesforce-based product data feed specification serving 15+ downstream platforms
- Built automated daily feed distribution to Google, Bing, Facebook, Criteo, Pinterest, TikTok, RTB House
- Created Google Local Inventory Ads feed integrating real-time store inventory data across 60+ retail locations
- Developed price update and supplementary feeds reducing pricing errors and improving Google Shopping compliance
- Reduced Google Shopping feed compilation time from 1.5 hours to 25 minutes through optimization
- Built Dynamic Product Ad feeds for Facebook/Instagram with 245% Y/Y revenue growth (\$417K to \$1.4M)

Platform-Specific Feed Implementations

- Google Product Listing Ads (PLA) feed - Full catalog with GTIN/UPC compliance, Big & Tall variants
- Facebook/Meta Dynamic Product Ads - Prospect and retargeting feeds with performance optimization
- Criteo Retargeting feed - Gender/category segmentation for audience targeting
- Pinterest Shopping feed - Seasonal refreshes driving \$1.1M platform-attributed sales (10K+ sales)
- Avantlink Affiliate feed - Commission tracking integration
- Bing Shopping feed - Cross-platform sync with Google structure
- PowerReviews feed - Product review syndication for on-site display
- YesMail feeds - Product, SKU-level, and rating feeds for email personalization
- Adobe Target/Recommendations feed - On-site product recommendations
- Adobe SiteCatalyst feed - Product category data for analytics
- Bloomreach feed - Related products widget, site search optimization
- Stylitics feeds - Product collection creation for email/on-site bundling
- RTB House feed - Display advertising product catalog
- Marpipe template feeds - Dynamic creative generation for Meta and Pinterest

New Channel Launches

- RTB House Retargeting (2023) - Pixel implementation, QA testing, feed development; drove \$8.3M in sales
- AMEX Card Linked Offer (2023) - Integration driving 10.7K new customers and \$2.7M sales
- Google Performance Max campaigns (2022) - Full creative asset integration, +12% total customers Y/Y
- Marpipe Dynamic Creative (2022) - Template system for Meta/Pinterest, ~50% of Facebook spend
- Facebook Dynamic Product Ads (2017) - First DPA implementation, \$400K+ fiscal year revenue
- TikTok Shopping - Feed development and pixel implementation
- Frequency Audio Ads - Location-specific streaming campaigns for store markets
- The Trade Desk - Programmatic display, streaming audio (iHeartRadio, Spotify), video campaigns

Website & Tag Implementations

- Salesforce Commerce Cloud migration - Complete feed rebuild, redirect management, tag updates
- PWA site launch support - Pixel testing, data layer updates across all digital channels
- Facebook Conversion Pixel - Implementation and testing across site
- Bing Conversion tracking - Tag implementation and upgraded URLs
- Impact Affiliate pixel - iOS conversion tracking fix, click ID integration
- Ovative MAP Pixel - Implementation, troubleshooting, URL parameter fixes
- Podsights pixel - Podcast advertising attribution

- TikTok pixel - Shopping campaign tracking
- Google Maps/Geocoding/Timezone APIs - Store page functionality
- Website Robots.txt - Search engine crawl optimization, variant page inclusion

Testing & Optimization Programs

- Digital Hold Out Test (2017) - Proved digital prospect programs drove 25% more sales than attributed
- Facebook Attribution Checkup - Validated 25% revenue lift vs. last-click attribution
- RTB House Incrementality Test (2023) - Independently validated \$6 ROAS
- Facebook Incrementality Study - Identified high-incremental prospect audiences
- Criteo/Datapop Shopping Test - Proved internal structure outperformed algorithm
- Criteo Buyers Delay Test - Learnings integrated into retargeting strategy
- Google Discovery Ads effectiveness testing
- Lookalike audience seed testing (Loyalty Builders data)
- Retention customer set targeting optimization
- PLA category-specific promotions (Free Ship No Min) - Increased conversion rate

SECTION 3: SEO SPECIALIST ACCOMPLISHMENTS

Technical SEO

- Created thousands of URL redirects for old-to-new website migration, resolved redirect issues at launch
- Developed and optimized website Robots.txt file, enabled crawling of thousands of previously excluded product variant pages
- Analyzed all category and product pages post-launch using Screaming Frog for missing Titles and H1 mismatches
- Worked with developers to update several hundred pages with corrected metadata
- Reviewed and implemented Ovation SEO team audit recommendations
- Resolved 404 errors, added missing page Title and H1 tag data post-site migration
- Decreased website page load time by working with Bloomreach to optimize image sizes

Content & Keyword Strategy

- Led SEO keyword research for product naming across hundreds of products for multiple seasons
- Coordinated and led naming review sessions with men's, women's, business, creative, and writing teams
- Built hundreds of thematic pages targeting long-tail organic keyword search traffic using Bloomreach
- Developed SEO tracking capabilities using SEMRush, categorized and tracked 1,400+ keywords (Brand and Prospect)
- Aligned Bloomreach page development with tracked keyword opportunities
- Created Bloomreach feed for related products widget on site

Local SEO

- Managed Google My Business listings for 60+ retail locations
- Created Google My Business Posts for store events (Grand Openings, Re-Openings)
- Implemented Google Maps, Geocoding, and Timezone API setup for store pages
- Evaluated Yext Local Business Listings tool for centralized store page content management

SECTION 4: PPC SPECIALIST ACCOMPLISHMENTS

Google Ads Management

- Drove doubling of Google Shopping prospect revenue Y/Y; overall Google Search grew ~40% Y/Y
- Built and managed campaigns for all new store locations
- Added hundreds of Brand and Prospect Ad Groups and thousands of new keywords
- Created Responsive Search Ads for leading text ad campaigns
- Built and brought live Branded Expanded Text Ads, rebuilt most Prospect campaign ads
- Implemented Google Performance Max campaigns driving +3% Y/Y new customers (144K to 148K)
- Reduced Brand CPC spend by nearly \$1M Y/Y, reallocating to higher-performing channels
- Led Google Store campaign development and Sitelink scheduling aligned with TV ads
- Built Google Local Campaigns driving estimated 92K store visits during Q4 peak
- Tested regionally specific Store Visit YouTube campaigns showing lift in store visits

Shopping Campaigns

- Led all data feed build and optimization projects for Shopping channels
- Brought SKUs feed live, obtained GTIN/UPC updates, rolled out Big and Tall product feed

- Segmented Shopping campaigns into buckets focusing spend on most important products
- Tested PLA category-specific promotions (Free Ship No Min) increasing conversion rate
- Ported Google Shopping campaign structure to Bing Shopping, synced feeds across platforms
- Designed Local Inventory Ads feed combining local products inventory with store data
- Validated in-store inventory levels with Google team, launched Local Inventory Ads nationally

Bid & Budget Management

- Built and allocated monthly/weekly budgets for all prospect channels
- Developed pacing reports to control spend, achieved targeted sales goals
- Regularly reviewed bids across all channels to adjust for efficiency and growth
- Worked with keyword match types to increase efficiency
- Added bid multipliers by location for geo-targeting optimization
- Implemented remarketing lists for search and shopping ads (RLSA) in Google
- Brought Customer Match retargeting audiences live, updated monthly

Bing Ads

- Implemented Bing Conversion tracking tag on website
- Brought upgraded URLs live across campaigns
- Ported complete Google Shopping campaign structure to Bing
- Maintained cross-platform feed sync between Google and Bing Shopping

SECTION 5: DIGITAL MARKETING SPECIALIST ACCOMPLISHMENTS

Social Media Advertising (Meta/Facebook/Instagram)

- Grew Facebook sales from \$3.5M (2017) to \$7M+ (2019) - 100% increase
- Achieved ~300% Y/Y revenue increase in Facebook (Q4 2015 vs 2016)
- Reduced Facebook ad ratio from 60% to 35% while growing revenue
- Built Power Editor template enabling quick build of weekly campaigns
- Installed and tested Facebook conversion pixel with web team
- Created Dynamic Product Ad feed using ProductsUp - \$400K+ revenue, 80%+ new customers monthly
- Developed Branded DPA campaigns replacing Criteo-managed campaigns for cost savings
- Led development and execution of all Facebook prospect advertising
- Developed and tested new ad units as they became available
- Implemented Meta Brand Protection application - daily infringement review and takedowns
- Created AKHG dedicated feed for Meta campaigns

Pinterest & Emerging Social

- Created seasonal Pinterest Shopping feeds driving \$1.1M platform-attributed sales (10K+ orders)
- Set up Pinterest campaign structure and provided team training
- Uploaded custom customer sets for category and retention targeting
- Implemented TikTok Shopping feeds and pixel tracking

Retargeting & Display

- Managed Criteo retargeting - increased efficiency while reducing budget
- Worked with Criteo to segment audiences by gender and category
- Rolled out seasonal creative updates with Criteo and creative teams
- Led RTB House onboarding (2023) - pixel, QA, feed development; \$8.3M sales
- Started RTB House Prospecting and Video campaigns
- Conducted RTB House incrementality test proving \$6 ROAS
- Built always-on display campaigns in Google Discovery Ads and TradeDesk

Streaming & Video

- Grew streaming channel spend 700% Y/Y with \$4.50 effective ROAS
- Launched YouTube and TradeDesk streaming campaigns for brand awareness
- Supported audio campaigns through TradeDesk to iHeartRadio and Spotify - \$8.00 marketing return
- Organized Frequency Audio ads with location-specific callouts for store markets
- Implemented Podsights pixel for podcast advertising attribution
- Tested Indivio video templates for Facebook Dynamic Product Ads

Affiliate Marketing

- Grew Affiliate channel sales 110%+ Y/Y with decreasing ad ratio
- Impact Affiliate program drove \$33M in 2023 (+13% Y/Y from \$29M)
- One-third of Affiliate customers were net new in 2023 (40.5K new customers)
- Achieved \$13.51 return on ad spend in Affiliate channel (2022)
- Capital One Shopping drove \$4.0M in H2 2023; Couponology generated ~\$800K

- Completed monthly order and returns reconciliation to reduce spend
- Fixed iOS conversion tracking with Impact and Rakuten teams
- Discovered and documented website error affecting Affiliate attribution, led development fix

Promotions Management

- Led monthly/weekly digital promotion scheduling and execution
- Created monthly digital promotion calendar coordinating across teams and Ovative
- Executed dozens of promotions annually with near-flawless accuracy
- Built promotion change text into PPC creatives for regular updates
- Led all digital code updates for global events, streaming, influencer campaigns
- Created promotional codes for retail stores during global promotions
- Set up and maintained digital marketing catalogs in Microsoft Dynamics AX
- Provided reliable weekend promotion support (Memorial Day, Labor Day, Black Friday, etc.)
- Led training session in Ecometry code creation for Web Merchandising team

SECTION 6: MARKETING ANALYTICS ACCOMPLISHMENTS

Executive Reporting

- Created Monday Business Insights report used by VPs, Directors, Managers across Marketing, CI, Email teams
- Report described as 'perfectly laid out with the right amount of information, incredibly helpful on Monday mornings'
- Developed weekly reports informing Weekly Report for Directors and executive team
- Provided insights for weekly Analyst Meeting shared with leadership teams
- Built Company Goals tracker for quarterly performance tracking
- Created concise monthly reports for executives on digital program performance
- Developed weekly Digital Marketing program reports covering Ecometry sales, CSE comparison, Y/Y performance

Performance Analysis & Reporting

- Created weekly, monthly, quarterly reports tracking channel performance, sales, margin
- Maintained reports on store visits, new customer rates, clearance sales, product/collection sales, Y/Y trends
- Built Prospect KPIs report for daily review of prospect program performance
- Developed product sales and margin reports guiding pricing and promotion planning
- Analyzed state-level data identifying CA and NY as emerging markets, ran targeted campaigns
- Created Incorta report for product exclusions from global promotion events
- Regularly provided ad hoc reports for weekly promotion effectiveness analysis

Attribution & Measurement

- Led implementation of Ovative Marketing Analytics Platform (MAP) - pixel testing, platform setup, margin data
- Designed and completed digital hold out test proving 25% incremental sales lift
- Partnered with Facebook on Attribution Checkup test validating 25% revenue lift vs. last-click
- Led data gathering for all digital channels for Analytic Partners Media Mix Model
- Built model scenarios and reports using Strategic Planning tool
- Analyzed monthly new customer data to optimize prospect program targeting
- Built New Customer/Order Id data feed importing to Adobe for channel customer type reporting

Customer Insights & Audience Development

- Discovered and activated unused Harris Poll contract - trained team, gave demonstration
- Led Harris Poll contract renewal for two-year customer insights generation
- Translated Audience Manager audiences to Adobe Experience Platform (AEP) for digital channels
- Linked customer audiences to Google, Facebook, and TradeDesk for campaign targeting
- Created and automated distribution of audiences to Google (RLSA), Facebook (Housefile), Criteo
- Built audiences in Facebook, tested segments (top 10% Housefile)
- Sent monthly Housefile to Criteo as exclusion audience increasing new customers

Budget & Financial Tracking

- Tracked all digital channel spend weekly, provided monthly actuals to Finance
- Responsible for monthly credit card bill reconciliation and digital program invoice coding
- Met weekly with Ovative and Marketing team to review and update channel budget allocations
- Achieved precise spending to budget through consistent monitoring and adjustment
- Shifted budgets based on MAP insights - more to Google Shopping, less to Facebook

SECTION 7: TECHNICAL ANALYST ACCOMPLISHMENTS

Data Integration & ETL

- Designed Salesforce Product data feed specification used across company
- Led development of core data feed serving 15+ external digital partners
- Built query for Google Local Inventory Ads pulling daily store inventory data
- Created query importing New Customer and Order Id data to Adobe
- Drove development of updates to Salesforce query to skip error records and continue build
- Worked to automate promotion update process in AX using scheduled queries

Website Tag Management

- Created technical documentation and test plans for all Web Marketing program tags
- Led website tag implementation for Salesforce Commerce Cloud migration
- Tested and implemented tags: Kenshoo, Facebook, Bing, Pinterest, Impact, Podsights, TikTok
- Updated website data layer revenue values for major digital marketing tags to match Adobe
- Troubleshoot Ovative MAP Pixel issues during PWA site testing, implemented URL fixes
- Worked with development team to update Impact website pixel for iOS conversion tracking

System Troubleshooting & Problem Solving

- Identified and corrected Price Mismatch and Category Mismatch errors in Google feed
- Found and documented MS AX Promotion Id bug affecting Affiliate attribution, led fix
- Worked with IT to resolve retail kiosk tracking issues
- Resolved incomplete data set issues during peak season requiring manual query rebuild
- Troubleshoot Adobe Analytics tracking issues after PWA site launch
- Corrected crawl issues post-website go-live
- Reviewed data to find and correct Local Inventory feed setup error affecting inventory levels

Compliance & Data Privacy

- Marketing team lead for CCPA and customer privacy issues
- Process weekly Delete and Do Not Sell customer requests across channels
- Automated customer exclusion from marketing channel audiences
- Developed Trademark Infringement SOP for addressing unauthorized use
- Implemented Meta Brand Protection application for trademark monitoring
- Worked with legal team on cease and desist notices for trademark infringement
- Submitted trademark infringement reports to search engines

SECTION 8: PROJECT MANAGEMENT ACCOMPLISHMENTS

Major Platform Migrations

- AX OMS rollout - Built digital marketing catalogs, developed promotion scheduling workflow
- Salesforce Website rollout - Led feed specification development, QA testing, partner feed builds
- Daily communication with developers and IT for several months before Salesforce site launch
- PWA site launch - Coordinated pixel testing across all digital channels
- SEM program transition to Ovative team - seamless handoff while maintaining performance

- Social prospect program transition to Ovative - connected creative team, established promotional cadence

Vendor Management & Evaluation

- Met with Datalogix team - discontinued after performance/cost review
- Evaluated Yelp and Positiontech for online store support - decided against
- Selected and implemented Indivo for Facebook video template development
- Evaluated Teemo for in-app store visit advertising
- Reviewed Yext for Local Business Listings management
- Researched and selected Marpipe for dynamic creative templates
- Managed ongoing relationships with Ovative, Criteo, RTB House, Impact, ProductsUp

Cross-Functional Collaboration

- Worked with IT, Ecommerce, Direct/Email, Creative, Business, Web teams on digital marketing growth
- Coordinated global promotions with Ecommerce, business, creative, and customer care teams
- Led product naming review sessions with men's, women's, business, creative, and writing teams
- Collaborated with Customer Insights team on audience development and AEP integration
- Worked with Retail Store team on Grand Openings, hours updates, digital code support
- Partnered with Accounting/Finance on monthly expense reconciliation and budget tracking
- Coordinated with Call Center on promotion updates and customer communications

Team Development & Training

- Helped onboard new team members with tutorials on Incorta reporting, campaign structure, Pinterest
- Provided ChatGPT integration training to marketing team
- Led Ecometry code creation training for Web Merchandising team
- Gave Harris Poll demonstration to Customer Insights team
- Assisted design team in learning Marpipe application
- Maintained open-door policy for questions, tutorials, and planning as senior team member
- Shared insights on market trends and application developments

Documentation & Process Improvement

- Created technical documentation for all Web Marketing program tags
- Developed Trademark Infringement SOP with complete workflow
- Built testing worksheets for global promotions
- Created documentation for dynamically updating website header information
- Developed clear cross-team communication processes during peak season
- Proactively identified and resolved data quality issues before they impacted campaigns

SECTION 9: QUANTIFIED RESULTS & METRICS

Revenue & Sales Impact

- Managed \$40M+ annual digital marketing budget driving \$200M+ in annual revenue
- Facebook sales: \$3.5M (2017) to \$4.8M (2018) to \$7M+ (2019) - 100% growth over 2 years
- Facebook Prospect sales: \$1.5M (2017) to \$2.8M (2018) - 80% Y/Y growth
- Facebook Dynamic Product Ads: \$417K (2017) to \$1.4M (2018) - 245% Y/Y growth
- RTB House Retargeting: \$8.3M in sales (April 2023 - Jan 2024)
- AMEX Card Linked Offer: 10.7K new customers, \$2.7M sales (2023)
- Impact Affiliate: \$19M (2022) to \$33M (2023) - 13% Y/Y growth
- Google Shopping prospect revenue doubled Y/Y; overall Google Search grew 40% Y/Y
- Pinterest Shopping: \$1.1M platform-attributed sales, 10K+ orders
- Capital One Shopping affiliate: \$4.0M revenue (H2 2023)
- Google Local Campaigns: 92K estimated store visits during Q4 peak

Efficiency & ROI Improvements

- Facebook ad ratio: Reduced from 60% to 35% while growing revenue
- Affiliate ROAS: \$13.51 return on ad spend (2022)
- RTB House ROAS: \$6.00 (independently validated via incrementality test)
- Streaming channels: \$4.50 effective ROAS with 700% Y/Y spend growth
- Streaming audio: ~\$8.00 marketing return
- Digital prospect programs proved 25% more incremental than attributed (hold out test)
- Facebook Attribution Checkup: 25% more revenue than last-click attribution credited
- Brand CPC spend: Reduced by ~\$1M Y/Y, reallocated to higher-performing channels
- Google feed compilation: Reduced from 1.5 hours to 25 minutes

Customer Acquisition

- Google Prospect campaigns: +3% Y/Y new customers (144K to 148K), +12% total customers (291K to 326K)
- Facebook DPA campaigns: 80%+ new customers acquired monthly
- AMEX Card Linked Offer: 10.7K new customers (2023)
- RTB House: 1.6K new customers (2023)
- Affiliate: 40.5K new customers (2023) - +4.5K Y/Y increase
- Affiliate: One-third of customers were net new (2023)
- Affiliate: ~20% new customers (2022)

Scale & Scope

- 11 years tenure building and optimizing digital marketing program
- 60+ retail store locations supported with Local Inventory Ads and store pages
- 15+ downstream platforms served by core product data feed
- 1,400+ keywords tracked and categorized in SEMRush for SEO
- Hundreds of thematic pages built targeting long-tail organic keywords
- Hundreds of product naming projects completed across multiple seasons
- Dozens of promotions executed annually with near-flawless accuracy
- 10+ tests conducted in Facebook and Google Discovery Ads in single year

[NEW] SECTION 10: AI-ASSISTED DEVELOPMENT QUANTIFIED RESULTS

Development Velocity

- SkillEngine: 125,000+ lines of code, 311 commits, 31 days solo development
- Peak development: 38 commits in a single day during initial architecture build
- Average velocity: ~10 commits/day, 8 skills/day, 2+ pages/day
- Media Mix Model: Full-stack platform with Bayesian modeling in 4 hours of active development
- Client CRM: Concept to production in 7 days with 50+ commits and 6 major UI components
- Consulting Website: 8 pages, custom design, SEO optimization in 6 hours
- Security Scanner: 16 automated checks with admin panel in 86 minutes (2 commits)

Platform Scale

- SkillEngine: 277+ AI skills, 24 automated workflows, 27 professional role templates, 48 application pages
- SkillEngine Testing: 1,790 tests across 316 files; 64,602 lines of test code (29% of codebase)
- SkillEngine Prompts: 44.8% of codebase is prompt templates; one file contains 53K lines with 152 role templates
- Media Mix Model: 30+ API endpoints, 12 database tables, 7 dashboard pages, 6 platform integrations
- Client CRM: 85+ target companies, 20 industries, personalized portal per company
- Marketing Campaign: 80+ personalized prospect emails with industry-specific messaging and portal links

Cost & Time Comparisons

What I Built	My Time/Cost	Enterprise Equivalent
SkillEngine (277-skill platform)	31 days, \$0	2-3 months, team of 3-4 devs
Media Mix Model	4 hours, \$0	\$400K-\$600K/yr SaaS
Client CRM w/ portals	7 days, \$0	\$15K-\$40K agency project
Business website (8 pages)	6 hours, \$12/mo	2-4 weeks, \$3K-\$10K + \$50-200/mo
Security scanner (16 checks)	86 min, \$0	Multi-day manual audit
80+ personalized campaigns	1 session	1-2 weeks agency work

Novel Technical Innovations

- Recursive self-improvement: Feedback-driven prompt optimization across six quality dimensions with rollback protection
- Multi-provider AI: Unified streaming interface across Claude, Gemini, and ChatGPT with model-specific token management
- Semantic matching: Deterministic hash variance generating unique skill recommendations per company from same algorithm
- Local-first architecture: Full offline functionality via IndexedDB with optional Supabase cloud sync
- Security-as-code: Enterprise audit categories reverse-engineered into executable client-side TypeScript scanner
- Prompt-as-product: 44.8% of SkillEngine codebase is production-grade prompt templates (1,000-3,000 words each)
